

Oven Brite

Oven Cleaner

Oven Brite has a great self cleaning, gel formula that is non-fuming for ease of use. It clings to vertical surfaces for prolonged cleaning activity. **Oven Brite's** potassium based formula provides strong carbon build up removal and free rinsing during clean up. Use on hot or cold ovens and grills.

DIRECTIONS FOR USE

REGULAR CLEANING: Wear rubber gloves. For gas ovens - DO NOT spray on pilot light. Use in either warm (200°F) or cold empty oven. Clean rack separately. Spread newspapers under oven door. Shake can well. With can upright, point valve opening toward surface to be sprayed and away from eyes. Spray oven surfaces with **Oven Brite** from a distance of 9 to 12 inches. Allow foam to work 5 to 10 minutes on warm surfaces, 1- to 20 minutes on cool surfaces. Then wipe clean with a wet cloth, sponge, or paper towel. Rinse oven thoroughly with potable water. For very heavily encrusted areas, repeat application using steel wool or soap pad. Pre-heat oven for 10 minutes before next use.

OVERNIGHT CLEANING: Follow directions above for using in a cold oven only. Spray the oven surface with **Oven Brite**, close oven door and allow to stand overnight. Wipe clean with a wet sponge. Rinse thoroughly with potable water.

TECHNICAL DATA

Color.....	Amber
Scent.....	Slight
Foaming	High
Solubility in Water	Complete
Density (lb/gal)	N/A
Flash Point	160°F
pH	N/A

FEATURES & BENEFITS

Oven Brite

Oven Cleaner

FEATURES

Heavy duty formula

Non-fuming

Free rinsing

Gel formula

CUSTOMER BENEFITS

Cleans fast, warm & cold ovens

Pleasant to work with

Less labor

Clings on surfaces longer for more contact time
